INTELLIGENT ORCHESTRATION

YOUR SYSTEMS ARE FIGHTING EACH OTHER. WE FIX THAT.

SpiceX is the **AI-native automation layer** that sits **on top** of your existing enterprise tools and makes them work together. No rip-and-replace. No 18-month migration.

Drag. Drop. Deploy.

LOWER PRO SERVICES COST	FASTER DEPLOYMENT	CIOS OPEN TO AI-NATIVE

THE PROBLEM

SILOED SYSTEMS

Salesforce can't talk to SAP. ServiceNow ignores Oracle. Data lives in islands.

18-MONTH MIGRATIONS

Traditional integrations take years and cost millions — then break on updates.

RUNAWAY PRO SERVICES

You're paying consultants to do what software should do automatically.

AI LOCK-IN

Most platforms force one AI vendor. When the model landscape shifts, you're stuck.

THE SOLUTION

SPICEX IS A SYSTEM OF SYSTEMS

One unified orchestration layer that connects your existing tools — Salesforce, SAP, ServiceNow, anything — without replacing them. Low-code/no-code builder. AI-agnostic. Deploy in weeks. Scale without consultants.

UNIFIED OUTPUT
One dashboard. One workflow. One source of truth.

LEGACY SYSTEMS
Salesforce · SAP · ServiceNow · Oracle · Any API

HOW IT WORKS

01
CONNECT
Plug into your existing tools via pre-built connectors. No custom code needed.

02
ORCHESTRATE
Visual drag-and-drop builder to design cross-system workflows in minutes.

03
DEPLOY
Go live in weeks, not years. AI handles routing, exceptions, and optimization.

USE CASES

CUSTOMER SERVICE
Unify ticketing, CRM, and knowledge base into one agent workflow.

IT OPERATIONS
Auto-route incidents across tools. Reduce MTTR by 60%+.

REVENUE OPS
Connect sales, marketing, and finance data for real-time pipeline visibility.

COMPLIANCE
Automated audit trails and policy enforcement across all connected systems.

SOC 2 TYPE II · HIPAA-READY · AI-AGNOSTIC · LOW-CODE / NO-CODE · 200+ CONNECTORS

STOP MANAGING. START ORCHESTRATING.

See how SpiceX eliminates the chaos between your enterprise systems.
